

## Mouse Anti-human CD20/AF750 antibody (BF00711)

## BF00711

## BF00711

human CD20/AF750
AF750标记 <b>小鼠抗人CD20</b> 单 <b>克隆抗体</b>
Mouse
Monoclonal
HI20a
not yet tested in other applications. optimal dilutions/concentrations should be determined by the end user.
33-37kDa
Liquid
IgG2a
0.01M PBS, 0.5%BSA, 0.03%Proclin300
Store at 2-8°C, protect from light.

In immunology, the CD3 (cluster of differentiation 3) T cell co-receptor helps to activate both the cytotoxic T cell (CD8+ naive T cells) and also T helper cells (CD4+ naive T cells). It consists of a protein complex and is composed of four distinct chains. In mammals, the complex contains a CD3γ chain, a CD3δ chain, and two CD3ε chains. These chains associate with the T-cell receptor (TCR) and the ζ-chain (zeta-chain) to generate an activation signal in T lymphocytes. The TCR, ζ-chain, and CD3 molecules together constitute the TCR complex.  SWISS: P11836

Gene ID: 931
