

## Mouse anti-human IgM ascites antibody

SL0345Ms

<b>Product Name:</b>	Mouse anti-human IgM ascites
<b>Chinese Name:</b>	小鼠抗人IgM腹水
<b>Alias:</b>	human-IgM;
<b>Organism Species:</b>	Mouse
<b>Clonality:</b>	Polyclonal
<b>React Species:</b>	hu
<b>Applications:</b>	WB=1:10000-50000ELISA=1:10000-100000IHC-P=1:10000-50000IHC-F=1:10000-50000 not yet tested in other applications. optimal dilutions/concentrations should be determined by the end user.
<b>Molecular weight:</b>	900kDa
<b>Form:</b>	lyophilized powder
<b>immunogen:</b>	human IgM protein purified from serum:
<b>Lsotype:</b>	whole antiserum
<b>Purification:</b>	Unpurified
<b>Storage Buffer:</b>	0.01M TBS(pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol.
<b>Product Detail:</b>	<p>IgM normally constitutes about 10% of serum immunoglobulins. IgM antibody is prominent in early immune responses to most antigens and is largely confined to plasma due to it's large size. Monomeric IgM is expressed as a membrane bound antibody on the surface of B cells and as a pentamer when secreted by plasma cells. Due to it's high valency IgM is more efficient than other isotypes is binding antigens with repeating epitopes (virus particles and red blood cells) and is more efficient than IgG in activating the complement pathway. The gene for the mu constant region contains four domains separated by short intervening sequences.</p>
