

Rabbit Anti-C6orf174 antibody

SL9538R

Product Name:	C6orf174
Chinese Name:	6号染色体开放阅读框174抗体
Alias:	C6orf174; CF174_HUMAN; Uncharacterized protein C6orf174.
Organism Species:	Rabbit
Clonality:	Polyclonal
React Species:	Human, Mouse, Rat, Chicken, Dog, Cow, Sheep,
Applications:	WB=1:500-2000ELISA=1:500-1000IHC-P=1:400-800IHC-F=1:400-800ICC=1:100-
	500IF=1:100-500 (Paraffin sections need antigen repair)
	not yet tested in other applications.
	optimal dilutions/concentrations should be determined by the end user.
Molecular weight:	101kDa
Cellular localization:	The cell membrane
Form:	Lyophilized or Liquid
Concentration:	1mg/ml
immunogen:	KLH conjugated synthetic peptide derived from human C6orf174:501-600/947
Lsotype:	IgG
Purification:	affinity purified by Protein A
Storage Buffer:	0.01M TBS(pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol.
Storage:	Store at -20 °C for one year. Avoid repeated freeze/thaw cycles. The lyophilized
	antibody is stable at room temperature for at least one month and for greater than a year
	when kept at -20°C. When reconstituted in sterile pH 7.4 0.01M PBS or diluent of antibody the antibody is stable for at least two weeks at 2-4 °C.
PubMed:	PubMed
r upivieu:	Making up nearly 6% of the human genome, chromosome 6 contains around 1,200
Product Detail:	genes within 170 million base pairs of sequence. Deletion of a portion of the q arm of
	chromosome 6 is associated with early onset intestinal cancer suggesting the presence
	of a cancer susceptibility locus. Porphyria cutanea tarda is associated with chromosome
	6 through the HFE gene which, when mutated, predisposes an individual to developing
	this porphyria. Notably, the PARK2 gene, which is associated with Parkinson's disease,
	and the genes encoding the major histocompatibility complex proteins, which are key
	and the genes encouning the major instocompationty complex proteins, which are key

molecular components of the immune system and determine predisposition to rheumatic diseases, are also located on chromosome 6. Stickler syndrome, 21-hydroxylase deficiency and maple syrup urine disease are also associated with genes on chromosome 6. A bipolar disorder susceptibility locus has been identified on the q arm of chromosome 6. The C6orf174 gene product has been provisionally designated C6orf174 pending further characterization.

Subcellular Location:

Membrane; Single-pass membrane protein (Potential).

Similarity:

Belongs to the SOGA family.

SWISS: Q5TF21

Gene ID: 387104

Database links:

Entrez Gene: 387104Human SwissProt: Q5TF21Human

Unigene: 319247Human

Important Note:

This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.

×

Sample:Raji Cell(Human) Lysate at 40 ug

Primary: Anti-C6orf174(SL9538R)at 1/300 dilution

Secondary: IRDye800CW Goat Anti-Rabbit IgG at 1/20000 dilution

Predicted band size: 101 kD

Observed band size: 101 kD
